

# Release 019: Congree Authoring Server Release Notes - 2021-05-05

	Congree component	Description
<b>Added feature</b>	Congree Reporting	Added possibility to access linguistic detail reports directly by way of a link.
		Added possibility to assign and revoke right to see linguistic detail reports.
	Testing	LoadTestTool now optionally supports https.
<b>Improved feature</b>	Back End Connector for Across	Congree Authoring Memory now supports namespaces in PTC Arbortext Editor.
	Congree Authoring Memory	Made Authoring Memory Core availability more reliable.
	Terminology	Reworked concept ID to count it per TermBase and to be able to consider it at import.
	Style Guide Manager	Added better protection to rule configuration to avoid losing unsaved changes.
<b>Changed feature</b>	Congree Reporting	Document Check now finishes without success message and linguistic report is opened in the browser.
<b>Corrected behavior</b>	Terminology	I can select "non" as a sublanguage in user settings but it has no effect or purpose.
	Congree TermTiger	Cannot edit field values after importing a field configuration.
		Certain value mappings can lead to wrong term display.
	Reporting Manager	CSV export of detail report does not contain all columns and order is incorrect.
		Columns in Detail Report sometimes change in size.
	Linguistic	Added linguistic update 115.
	Congree Control Center	Cannot copy nor move status or cases in user lexicon.
		English Best Practices rule set is missing important rule "unknownres".
	Congree Linguistic Compiler	Compilation does not contain correct chain configuration.
	Editor support	PTC Arbortext Editor sometimes shows error "The arithmetic operation caused an overflow."
Congree Authoring Memory	In Microsoft Word, Congree Authoring Memory Candidates Panel does not always clear after all Authoring Memory Candidates have been forwarded.	
Style Guide Manager	Bulk change in user lexicon freezes when a change would lead to a duplicate.
