

Release 022: Congree Authoring Server Release Notes - 2021-06-15

	Congree component	Description
Added feature	Congree Deployment Assistant	Added new feature "Congree Content Analysis" to Congree Data Grooming.
Improved feature	Congree TermTiger	Improved IIS configuration in case of HTTPS.
	Congree Web API	Increased performance of Congree Web API.
	Congree Authoring Memory	Updated sentence segmentation rules für Congree Authoring Memory.
	Congree Deployment Assistant	Improved configuration and accessibility of Congree when HTTPS is used.
Changed feature	Terminology	Congree now supports subattributes of Kaleidoscope quickTerm.
Corrected behavior	Congree Health System	Congree Health no longer operational.
		Congree Health shows an error when database for Linguistic Engine DE is missing.
	Congree Authoring Memory	In some cases, similarity is calculated incorrectly.
		Challenge does not work correctly in all cases.
		Cannot approve sentences for French and Spanish.
		Not all approved sentences are later found as 100% matches.
		Removing the last character of a paragraph removes results from Congree Authoring Memory in Congree für Microsoft Word.
		Some sentences are stored incorrectly in Congree Authoring Memory.
	Congree Web API	First check against Congree Linguistic Engine fails after IIS has been restarted.
Terminology	In some cases definitions do not show in Congree for Microsoft Word when the terminology system is Kaleidoscope quickTerm.
